

# Universal Gas & Electricity Meter OverBox

The JML Universal 'Overbox' has been specifically designed as a new cover for vandalised, and thus dangerous, gas and electricity meter cupboards.

Constructed for strength in aluminium, polyester powder-coated white or brown. The Universal 'Overbox' incorporates a full length 316 stainless steel piano hinge assembly, no external fixings, two budget locks, and internal rag-bolting to the wall, making it cost effective and secure.

To fit over maximum size 700mm x 550mm x 100mm

Special sizes can be manufactured and delivered in 4 weeks
