

O³ Trucker Ozone Generators

The O³ Trucker is a specially designed 12 V ozone generator for use in vans, lorries, trucks and carriage vehicles. This unit is able to deliver 5 - 45 mg/hr of ozone, dependent on the size of application. Units with a larger output are available on request.

Neutralising odours and oxidising bacteria, the unit needs no consumables, or need for replacement cartridges. As illustrated, the unit detaches from the base to allow cleaning procedures to be safely carried out.

No chemicals

No residues

No consumables

Low maintenance

To prolong the life of the unit in damp and humid environments, the ozone chip is heated.

The fan and ozone chip are easily replaceable for maintenance purposes.

O³ TRUCKER

Voltage 12 v

Power Consumption 10 Watts

Size L x W x H 200 x 55 x 120

Weight 700 Grams

Ozone Output 5 - 45 mg/hr

Mounting Permanent

Special Features CE Approved
